

**ACKNOWLEDGEMENT OF NOTIFICATION
OF HAZARDOUS WASTE ACTIVITY**

03/20/90

This is to acknowledge that you have filed a Notification of Hazardous Waste Activity for the installation located at the address shown in the box below to comply with Section 3010 of the Resource Conservation and Recovery Act (RCRA). Your EPA Identification Number for that installation appears in the box below. The EPA Identification Number must be included on all shipping manifests for transporting hazardous wastes; on all Annual Reports that generators of hazardous waste, and owners and operators of hazardous waste treatment, storage and disposal facilities must file with EPA; on all applications for a Federal Hazardous Waste Permit; and other hazardous waste management reports and documents required under Subtitle C of RCRA.

EPA I.D. NUMBER ->	NJD002355121
FACILITY NAME ->	CONCORD CHEMICAL CO INC
MAILING ADDRESS ->	17TH & FEDERAL STS CAMDEN, NJ 08105
INSTALLATION ADDRESS ->	17TH & FEDERAL STS CAMDEN, NJ 08105

[illegible]

X. Description of Hazardous Wastes (continued from front)

A. Hazardous Wastes from Nonspecific Sources. Enter the four-digit number from 40 CFR Part 261.31 for each listed hazardous waste from nonspecific sources your installation handles. Use additional sheets if necessary.

1	2	3	4	5	6
7	8	9	10	11	12

B. Hazardous Wastes from Specific Sources. Enter the four-digit number from 40 CFR Part 261.32 for each listed hazardous waste from specific sources your installation handles. Use additional sheets if necessary.

[illegible]

C. Commercial Chemical Product Hazardous Wastes. Enter the four-digit number 40 CFR Part 261.33 for each chemical substance your installation handles which may be hazardous waste. Use additional sheets if necessary.

[illegible]

D. Listed Infectious Wastes. Enter the four-digit number 40 CFR Part 261.34 for each hazardous waste from hospitals, veterinary hospitals, or medical and research laboratories your installation handles. Use additional sheets if necessary.

[illegible]

E. Characteristics of Nonlisted Hazardous Wastes. Mark 'X' in the boxes corresponding to the characteristics of nonlisted hazardous wastes your installation handles. (See 40 CFR Parts 261.21 - 261.24)

- ☐ 1. Ignitable (D001) ☐ 2. Corrosive (D002) ☐ 3. Reactive (D003) ☐ 4. Toxic (D000)

XI. Certification

I certify under penalty of law that I have personally examined and am familiar with the information submitted in this and all attached documents, and that based on my inquiry of those individuals immediately responsible for obtaining the information, I believe that the submitted information is true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment.

RCRA Inspection Report
Concord Chemical Co., Inc.
17th and Federal Streets
Camden, NJ 08105
(609) 966-1526

Lead Inspector: James Sullivan, Environmental Engineer, USEPA Region 2
Inspector: Edward J. Guster III, Environmental Scientist, USEPA Region 2

Date of inspection: June 9, 1999
Time of Inspection:

Generator ID Number: NJD002355121

Reason for Inspection: Compliance Evaluation Inspection, Camden Inspections

Attendees: John Boyle - Operations Manager

Background:

Concord Chemical Co., Inc. (Concord) is a soap producing manufacturer (coconut and vegetable oil based) and distributor of cresylic acid. The building consist of three (3) floors and a basement. The facility had a one time shipment of hazardous waste in March of 1997 of obsolete Perchloroethylene (perc) (D039). The perc is no longer used at the facility. The facility does not generate hazardous waste according to Mr. Boyle.

The soap is made by mixing the oils with water, potash, and caustics cooking for 20 hours at 190° F in three (3) large kettles. At the right product recipe, the soap is packed in drums, totes, and tank wagons, and shipped to customers. Any QA/QC samples tested, are mixed back in with the rest of the batch for making the soap.

The cresylic acid comes from Europe. The cresylic acid is stored in tanks outside the building. It is a wire soothing acid that is coal tar based. The acid is blended to customer specifications and sold to them. The acid is sent out to customers in 55 gallon drums or in bulk. There was a spill of the acid in 1990. State and local officials were notified.

A 20K gallon UST was recently removed and replaced with a 6K gallon double walled UST. The UST stores fuel oil. There are about 50 drums of UST removal waste and 8 drums of tallow and gravel stored in the fenced in parking lot. Intergrated Technical Services (Intergrated) is in charge of the pick up and clean-up of the drums. The drums remain in the yard because Intergrated has not yet picked them up. Mr. Boyle calls to remind them of the pick-up.

Recommendations:

This facility is in compliance. No further action is needed. A RCRIS Data Discrepancy Form will be filled out for this facility.
